

# VERMONT SLEEP SOUNDS & MUSIC USES IMMERSIVE AUDIO TO HELP USERS SLEEP

Burlington, VT — May 15, 2020 — Jeff Perrin Music, LLC today released Vermont Sleep Sounds & Music for iPhone and iPad. Vermont Sleep Sounds & Music features original recordings of music, nature and white noise sounds, meticulously hand-crafted for quality and effectiveness on mobile devices. The app is the first of it's kind to include support for Dolby Atmos, a new feature on iPhones and iPads which takes advantage of multiple speaker arrays to present a richer, more immersive audio experience.

## About the App

Beyond it's innovative support for Dolby Atmos audio, Vermont Sleep Sounds & Music is also unique in that many of the sounds offer variable options which allow users to customize their own sleep soundscape. For example, fans sounds all have various speed settings and the rain sounds are offered as with or without thunder. A mixer page allows users to blend sounds and set custom audio levels, and the sleep timer features a slow, gentle fade.

## Vermont Sleep Sound & Music Feature List

- Configurable sounds let users adjust fan speeds, select wind intensity, or even toggle thunder on or off for rain sounds.
- Dolby Atmos support enhances speaker or headphone experience to help users escape their surroundings.
- Music tracks feature a mix of tranquil piano and classical guitar melodies. Perfect for meditation or drifting off to sleep.
- Mixer function allows users to blend sounds and set custom audio levels.
- Subscription-free business model. A single in-app purchase unlocks all current and future sounds.

## Pricing and Availability

Vermont Sleep Sounds & Music is available as a free download on the App Store. A single in-app purchase unlocks all current and future content.
